Dietetic Recovery Platform for the Home Setting

Fitango Health can help your dietetic team substantially improve recovery outcomes and reduce costs by ensuring effective post-discharge workflows

Fitango Health Platform

Fitango Health is a nutrition and dietetic post-acute, discharge platform that improves recovery outcomes and reduces costs for providers and patients in the home setting. By Utilizing our innovative platform, patients are:

- Guided through their recovery
- Tracked for optimal health
- Connected with clinical care teams through telemedicine components
- Accessed by care team members through remote-patient monitoring

The Fitango Health platform synchronizes data from an EMR/EHR system using the embedded HealthShare Connect application*.TM

Defining Your Dietetic Process

Fitango Health understands the importance of a comprehensive post-discharge process for dietetic events, such as:

- Dietetic Health Management
- Targeted Diet Plans
- Heart Healthy Eating

The integrated solution allows care managers to effortlessly create and prescribe custom plans to patients, or their family members, with the ability to monitor their reported values. Care Plans include:

- ActionPlans
- Medication Plans
- Checklists
- Video Plans

Post-discharge Recovery Workflow

Discharge planners can now interactively empower cancer patients to get involved in their treatment process and foster an intuitive experience for patients to be supported in their path to improved health.

By building and assigning custom ActionPlans as part of the discharge process, the relationship with patients is active and personalized.

Analytics & Outreach

Understand the changing health of your patient population:

- Stratify patient's risk with your own risk stratification models or utilize the built-in modules
- Use cohort management to improve care delivery while enhancing outreach
- Analyze the performance of your providers against patient's health data
- Receive and send real-time clinical data and alerts through integrations with EMR/EHR systems

Platform Key Facts

- ✓ Secure and HIPAA compliant
- ✓ Cloud-based, web, and mobile accessible
- ✓ White-label and customizable
- ✓ Embedded EMR/EHR interoperability using InterSystems HealthShare Connect™
- ✓ Open architecture
- ✓ Integrated telemedicine and remote-patient monitoring
- ✓ Rapid deployment, easy to use
